(8) According to the prescriptions of the working plan the areas where grazing is permissible (last column under question 3) are open to grazing only for 6 months (July to December) but owing to drought and fodder scarcity they have been thrown open to grazing throughout the year since 1918-19.

(9) The protection working circle comprising an area of 10,531 acres should not be grazed over, but owing to the above reasons this area also has been thrown open since 1918.

(10) Seeds of Tangedu and other species were sown in the years against the localities specified below, but owing to failure of early rains the results were very poor.
